

## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **LISTING OF CLAIMS:**

Claims 1-5 (cancelled).

6. (New) A navigation system, comprising:

a drive for reading out navigation data; and

a data medium configured to store the navigation data, a pregap being present on the data medium in addition to the navigation data, where identification information is stored in a pregap of the data medium, the drive being configured to read the identification information in the pregap.

7. (New) The navigation system as recited in claim 6, wherein the data medium is a CD-ROM.

8. (New) The navigation system as recited in claim 6, wherein the pregap ranks above logic block address "0".

9. (New) The navigation system as recited in claim 6, wherein a copyright note is stored in the pregap.

10. (New) A method for operating a navigation system including a drive for reading out navigation data from a data medium which has a pregap, logically ranked above the navigation data, wherein the identification data is stored in the pregap, the method comprising:

reading, by the drive, the identification data; and

blocking access to the navigation data when no identification data exists or when wrong identification data exists.
